Mistral B200

Mistral B200 is a fully automated blower developed especially to make day-to-day setup easier in gymnastics associations.

Mistral B200 is time saving, easy to use and handily transported. It automatically fills and Airtrack with air without supervision, it can maintain the pressure, and in no time at all it can empty the air out of the airtrack after training. All while you are doing other things.

Plug & Play

Place it on the Airtrack, turn on the blower. That's it! Mistral B200 automatically starts filling the Airtrack until the desired pressure is reached. You don't need to stay with the Airtrack. Afterwards, the blower stops automatically. The pressure is easily set using the arrow keys, and can be read on the display. If the pressure falls in the Airtrack, the Mistral B200 sees to it that more air is pumped in, so it stays at the desired pressure throughout the training, corresponding to your level, be it elite, children, or tumbling.

When you are finished with the training, you set the hose to "DEFLATE" and the blower will suck all the air out of the airtrack, while you continue with other tasks. When the Airtrack is completely empty, it will stop automatically. It is smart and time saving, and the airtrack can now be rolled up in the best possible

Many advantages

- Fully automatic filling blower
- Fully automatic pressure regulation
- Fully automatic emptying of Airtrack
- Saves time and facilitates setup and take-down
- Easy to use
- Remembers settings

Specifications

- 1700 l/min
- 30 til 100 mbar pressure
- L:470 mm Ø:30 mm
- Weight 8,5 kg.
- 220 V/ 50 HZ

Suggested retail price excl. VAT

€ 599
